

## Integrated POS Application Development for Retail Client

### Client:

Our client had a POS development for one of their reputed retail client who had their business operations across various US states.

### Business Challenge:

The requirement was to develop a highly secure and scalable Retail POS solution with integrated analytics and cloud data storage features. Additionally the data from the retail POS should be integrated to their existing ERP system where it could be managed along with other operations.

### Solution Delivered:

After carefully understanding their requirement our team proposed **highly secure** and custom built Retail Point of sales system with a built in high secure cloud data storage. Furthermore, the data from the POS system was integrated to their existing ERP system through cloud.

## Business Benefits:

Our Retail POS Application included a ton of powerful features to enhance their business including:

-  Product Lookup
  -  Product import and export
  -  Secure multiple payment options
  -  Easy Return and refund features
  -  User Accounts and permissions
  -  Mobile support
  -  Secure Cloud Data Storage
  -  Powerful Analytics features
  -  ERP Integration
- And More

## Technologies Used:

**Man Hours: 1200 hrs**
