

## Migration of Drupal 7 to Drupal 8

### Client:

The client is a leading healthcare solution provider that helps customers providing innovative healthcare products in the US.

### Business Challenge:

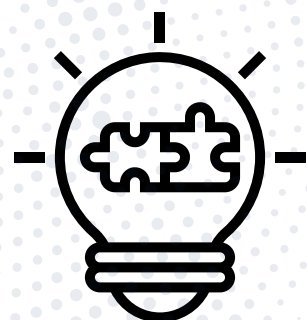

Our client wanted a strong market presence and new opportunities for their business through marketing and sales. The client had a website and they wanted to improve and migrate from the older version of Drupal to the new one. The existing site was built with Drupal 7 and they wanted to migrate to Drupal 8. Also the additional requirements:

- 1. User-friendly look and professional website
- 2. Advanced search options
- 3. Improved website Performance and Easy Navigation
- 4. Advanced strong security features
- 5. Rich set of modules
- 6. Advanced theme, plugins, and interactive UI/UX
- 7. Exclusive sections for products.
- 8. CTA implementation and direction
- 9. And more

### Solution Delivered:

After thoroughly analyzing their business challenges and all their above requirements, we helped them migrating their website that would be beneficial for their business. With the latest version of Drupal 8, they got a chance of making

their business website more streamlined for their promotional purpose and redesign their website look for their clients.

## Business Benefits:

With migrating from Drupal 7 to Drupal 8 for their healthcare product website, they were able to achieve what they asked for:

-  User-friendly and SEO friendly
-  Website with Easy Navigation
-  Less prone to hacking (Highly secured)
-  Rich set of modules and functionality in the website
-  Access for more innovative themes and plugins with UI/UX
-  Scalability
-  Responsive
-  Mobile Friendly
-  High website Performance
-  Easy adaptable and Migration to the new version
