

BigCommerce Website Development for Online Furniture Store

Client:

The client is a reputed Furniture manufacturer and seller in the USA

Business Challenge:

The client is a reputed Furniture manufacturer and seller in the USA

- Manage orders, accounting, inventory, and shipping on a single Application.
- Ecommerce website with a secured digital payment gateway
- Order Tracking and Shipping details
- Sync the order information from the ecommerce store

Solution Delivered:

After a complete analysis of their business challenges and all their above requirements, our team came up with developing an online furniture store from scratch. Also, we helped them integrating REST API sync the order information from the ecommerce website.

Business Benefits:

With BigCommerce Platform we delivered a highly personalized customized ecommerce online store that was able to achieve what the client asked for:

-  Highly secured portal
-  Products and Customers management
-  Easy navigation within the store
-  Order tracking and shipping details
-  Inventory and order management
-  Secured Payment gateway
-  Powerful tracking analytics for every transaction
-  Mobile friendly
-  Account Management
-  SEO friendly
-  Built in Marketing tools and Analytics
-  24/7 support
